

Conscious currencies | Regenerative cultures

Cultivating the power of decentralized finance to create new economic systems for a thriving global civilization.

“Instability and populist unrest is the new world order.”

Washington Post

“1 Million species at risk of extinction.”

U.N. Report

“The world spent \$5.2 Trillion subsidizing fossil fuel use.”

U.N. Report

Our current financial systems do not effectively serve humanity, nor our planet. When it comes to money, people, states and organizations have limited options, using money plagued with:

- high **price volatility**
- **slow transaction** speeds
- **usury** and impossible to pay back debts\
- **Seigniorage only benefits a minority**
- **no direct governance** (oligarchy & plutocracy)
- systems that **siphon value** from local communities
- **no transparency**
- **transaction fees**
- **losses in buying power** (USD inflation up to 6x higher than official rates)
- designs that finance war & **environmental devastation**
- **extreme inequality**

Redesigning value exchange

Seeds (the currency) is an evolution in money, establishing new expectations for what currency can do for society.

The SEEDS currency symbol

- Seeds are algorithmically governed by **transparent protocols**, not opaque institutions
- Gives active contributors (Citizens) a **direct voice** in governance
- World's first global “better than free” currency that rewards use
- Exponentially **regenerates our planet**, addressing our climate crisis!

Not just a concept

The **core functionality is live**, we've been experiencing alternative economic and governance models since the launch of “the SEEDS Passport” and Seeds currency November of 2019.

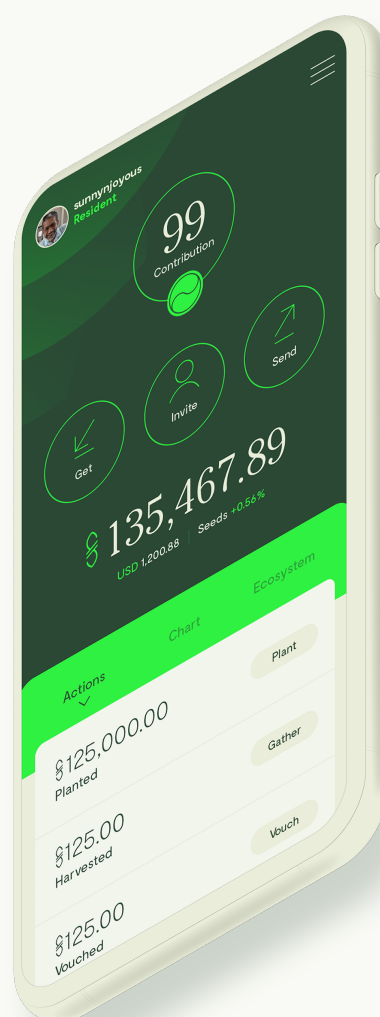

The Minimum Viable Economy (MVE)

The foundations of our global societies are **financial** systems. SEEDS offers an alternative. On top of a Citizen governed and evolved financial system, the members of SEEDS are given tools to construct and evolve **new governance, organisational and economic (how we coordinate)** systems. These tools give members a route to re-imagine, co-create, and co-evolve a globally regenerative civilization. **So humanity can opt-into more regenerative and fulfilling tools for global coordination.**

Opportunity

An economic system that's **regenerative** by default and a governance system that's **inclusive** by design.

1. Offer **more purchasing power stability** than traditional national and crypto-currencies.
2. A visually stunning and intuitive UI designed by Webby and Cannes Lion **award-winning designers**.
3. Built with the **powerful EOS.IO blockchain** OS ($\geq 66,454$ times more energy-efficient than Bitcoin.)
4. Provide **near-instant “better-than-fee-free” transactions** encouraging mass adoption.
5. Give “Citizens” **a direct and equitable voice** in governance that's **not** just oligarchies (governance solely dependent on token holdings.)
6. **Empower communities** with shared financial resources to invest locally.

7. Provide tools and align incentives for global contributions (beyond simply financial transactions) to **encourage participation, co-creation, and adoption.**
8. Value is directed towards the **exponential regeneration** of our planet; via funding for Citizen-directed initiatives that deliver positive environmental & societal outcomes ([more here](#)).
9. Create a more equitable, fun, and empowering financial system to **unleash human potential** and facilitate a globally regenerative culture.

A global and decentralized organisation, by the people and for our planet

SEEDS' DNA is crafted by Hypha (Decentralized Human/Holonic Organisation), an award-winning team and alliance of passionate entrepreneurs, researchers, technologists, financiers, artists, ecologists and whole-systems designers.

For SEEDS to be a truly decentralized financial and governance system, the organization building it needs to be decentralized. For this reason, Hypha built the first-ever holarchy-inspired DAO (Decentralized Autonomous Organization) that we call a Decentralized Holonic/Human Organisation (DHO - pronounced "DO").

The DHO empowers a global community to co-create and build tools with Hypha!

Members are

- 50+ core members (contributing regularly) with 200+ more contributors & advisors
- Over \$40M USD of value in contributions since mid-2017
- 100+ years of full-stack development experience
- 60+ years of blockchain development experience
- Entrepreneurs and founders of 13+ successful organizations many with MM USD+ revenue
- Practical wisdom in storytelling, complex system design, game theory, token engineering, classical finance, community building, regenerative economics, etc.

[See the current membership of the Hypha DHO](#)

A Global Alliance for Global Regeneration

450+ organisational alliance members aligned to use these tools to collaborate on global regeneration and whole systems transformation. For organisations it's simple: More money, more voice and more rewards for doing good and creating a healthier economy!

Your Borderless Passport

The app is called a "Passport" as it contains all the features necessary to access and participate in a new global economy. There is a place to connect with like-minded people, businesses, and people to exchange with, forums to share ideas, and a governance system to evolve the rules, distribute finances, and collectively own assets.

In SEEDS, joining and creating a new economic system is as easy as downloading an app!
